Major: Marketing
Role: Marketing Strategy
(Pricing and Promotion)

Executive Summary

SecureTag is built to tackle a simple but frustrating problem: people lose things all the time. Unlike existing trackers such as AirTag or Tile, SecureTag works across platforms and uses multiple tracking technologies to offer more accurate updates, stronger security, and a design that can be attached almost anywhere.

The smart-tracking market is growing fast, but most current products still have major gaps, especially when it comes to cross-platform use and real-time accuracy. That leaves a clear opening for a device that's more flexible, more reliable, and built for everyday life as well as business use.

Our marketing plan centers on standing out through true product differentiation, targeted digital outreach, and expansion into both consumer and enterprise markets. With its broader compatibility and practical features, SecureTag is well-positioned to deliver better performance and more meaningful value than the trackers people rely on today such as Apple AirTag and Life360 Tile.

Situation Analysis

- **Marketing need**: The need for this product stems from the tendency people have to forget where items are because sometimes there is just too many items to keep track of. **SecureTag** aims to hopefully resolve and gradually relieve this issue.
- **Target market(s)**: Marketing to regular everyday consumers, everyone needs to know where everything is.

Items (important ones especially like wallets, keys, even certain family heirlooms) can be kept secure under a watchful eye. Retrieving and tracking lost items is probably one of the most common problems in the modern world.

For businesses marketing, it allows them to keep track of their inventory, make sure items are not lost in transit, and if so, locate it.

- From the location updating intervals (customizable), to utilizing BLE (bluetooth low energy) and UWB (ultra wide band), SecureTag has the opportunity to become one of the most efficient and helpful location tracker.

Industry Analysis

- **Growth**
 - \$720M (2025)
 - \$1.31B (2033)
 - 12.72% CAGR
- **Trends**
 - Rapid advancements in UWB and Bluetooth
 - Declining average prices of low-power wireless chipsets
- **Barriers to Entry**
 - Consolidated market (5 major players)
 - Network density
 - Patent access

Competitive Analysis

Key Takeaways

- Apple Dominates the market
- Tile is the strongest alternative
- Samsung is behind the rest of the competition
- The price is Economically Driven
- Must differentiate to be able to enter this dominated market.

	Competitor A	Competitor B	Competitor C
Sales Revenue	Apple Air tag	Tile	Samsung SmartTag
Units Sold	55 Million	40 Million	Tens of Millions
Market Share	69%	11%	7%
Price Point	\$30	\$30	\$24
Position	Dominant market-leader	Foundational, cross-platform solution	Primary tracking solution for Samsung Galaxy users

Environmental Analysis

(Dominic D'Alessio)

Key Takeaways

- SecureTag offers **more technology** than AirTag or SmartTag.
- Biggest advantage: **cross-platform compatibility**.
- Strong business-to-business potential beyond what competitors target.
- Main challenge: competing against **large, established networks**.

Strengths

- Multi-protocol tracking (RFID + BLE + UWB + NFC)
- Works on both iOS & Android
- Flexible mounting (magnet, Velcro, suction, keychain)
- Rechargeable battery & durable build
- B2B customization for enterprise use

Opportunities

- Huge untapped cross-platform market
- Broader use cases (tools, equipment, bikes, logistics)
- Corporate/industrial partnerships
- Strong privacy-focused marketing
- Versatile mounting makes it ideal for tools, equipment, and job-site assets.

Weaknesses

- Higher production cost
- Larger size than AirTag / SmartTag
- Must build tracking network from scratch
- App setup may be less seamless
- Requires battery recharging

Threats

- AirTag's massive Find My network
- Samsung's SmartThings Find ecosystem
- Brand loyalty to Apple/Samsung
- Privacy regulations for tracking devices
- Competitors may undercut on price

Target Audience

Everyday Consumers

- Ages 18–45
- Students & working professionals
- Tech-comfortable, value convenience
- Often misplace keys, bags, or small items

Travelers and Commuters

- Ages 20–60
- Frequent fliers and daily commuters
- Track luggage, backpacks, and travel gear
- Want precise, reliable updates
- Value peace of mind

Business & Enterprise Users

- Companies with 20–1,000 employees
- Companies wanting to track employee equipment
- Use tag for logging into work systems
- Use tag to scan into buildings/offices

Personas

BRANDON

**(32) Frequent
Traveler**

Flies often for work

Needs fast,
accurate 15–30
minute location
updates

Uses offline
features to see last
known locations
during flights

CYNTHIA

**(19) College
Student**

Loses keys and ID
often

Wants a small,
rechargeable
tracker

Uses app alerts
like “Item left dorm”

RON

**(45) Business
Owner**

Tracks company
tools and devices

Uses tag for
employee check-in

Likes simple app
dashboard for
monitoring

Marketing Goals & Objectives (Ye Liu)

- Increase brand visibility by positioning our product as the smallest and longest-lasting smart tag.
- Enter a market dominated by Apple, Tile, and Samsung through clear product differentiation.
- Drive early adoption among everyday users, travelers, and businesses with multi-tech tracking and long battery life.
- Build customer satisfaction and loyalty through accurate tracking and a smooth app experience.
- Expand into enterprise and logistics using advanced features like temperature and light monitoring.

Smart Objective (Ye Liu)

Brand Awareness (First 12 Months)	Increase overall brand awareness by 25% through social media campaigns, tech influencer reviews, and targeted ads focused on portability & battery life.
Market Share (Within 18 Months)	Capture 2–3% of the smart-tag market by targeting users underserved by Apple AirTag, especially Android users, travelers, and small businesses.
Sales Revenue (Year 1)	Reach \$300K–\$500K revenue in the first year through online sales, Amazon listings, and selective retail partnerships.
Customer Acquisition (Year 1)	Reach 20,000 active users, including everyday users, travelers, and business customers needing asset tracking.
Product Performance (First Year)	Deliver 95%+ tracking accuracy, stable 15/30/60-minute update intervals, and a battery life 2× longer than Apple AirTag.

Year 2-3 goals_(Ye Liu)

Year 2 Objectives — Expansion & Growth

- Expand national retail distribution (Amazon, Best Buy, campus tech stores).
- Grow user base to 50,000+ active users.
- Increase market share to 4–5% with stronger Android and enterprise adoption.
- Release product accessories (magnetic mount, silicone case, travel attachments).
- Introduce advanced app features (offline tracking history, automated alerts).

Year 3 Objectives — Scaling & International Reach

- Expand internationally (Canada, Europe, Asia).
- Launch enterprise analytics dashboard for logistics/asset tracking.
- Secure 10+ enterprise clients, leveraging temperature/light sensor data.
- Reach 100,000 total users across all segments.
- Establish a recurring revenue model through premium subscription features.

Marketing Strategy - Product

Value proposition	Save time finding your items with peace of mind across all operating systems
USP	Quand-hybrid technology (GPS, Bluetooth, UWB, NFC), works on any OS (IOS, Android, Windows)
Differentiation	Alerts (left-behind & out of zone), Accessories (magnet, Velcro, keychain), eco-friendly packaging, rechargeable battery,
Customer Experience	Optimized software, comprehensive customer service
Loyalty	2-year warranty

Marketing Strategy - PLACE

Selective
Distribution

Online

National

Marketing Strategy - **PRICING**

- Value Based Pricing
- Priced around \$40-\$45
- Comparison to competitors: Apple Airtag: \$29, Tile Pro: \$35, Samsung SmartTag: \$30
- This pricing is more expensive than competitors but is justified because of our tag's superior accuracy, flexibility, cross-platform capabilities, etc
- Promotional Pricing: Bundle (2- pack) for 10% off, Black friday 20% off, Back to school 10% off

Marketing Strategy - **PROMOTION**

Advertising strategy

- Online and social media
 - Channels such as Google search, Tik Tok ads, Meta ads, YouTube
 - Visual ads allow for effective showcasing of the products capabilities such as it's mounting options and durability
 - Public relations and media outreach
 - Press targets: Tech publications (*Wired*), Travel press (*Travel + Leisure*), Business publications (*Forbes*)
 - PR angles: Superior privacy controls, safety focused
 - Addresses safety concerns surrounding AirTags and stalking
 - Influencer Partnerships
 - Tech reviews for credibility, travel/lifestyle creators for real world demos

Evaluation & Control

Hannah

How will we monitor the plan?

- Track product performance using customers' monthly/yearly rating.
- Use analytics dashboards (e.g. app data, sales reports, website metrics)
- Hold meetings monthly between each levels to review the overall performance of the products, customers' satisfaction, and also the market.

Evaluation & Control

Hannah

Key Performance Indicators (KPIs)

MARKET KPIs:

- How many units we sell each month
- Changes in market share
- Website traffic and how many people actually click “buy”
- How often people use the app
- Reviews, shares, or referrals
- Interest from businesses who want custom-branded tags
- Return or defect rates

Evaluation & Control

Hannah

Key Performance Indicators (KPIs)

PRODUCT KPIs:

- How accurate the tracking is
- Whether the update works correctly
- Battery life performance
- How easily users can pair the device
- Number of support issues or complaints

Evaluation & Control

Hannah

If things are ON target :)

- Keep doing what works and put more time/money into successful marketing
- Slowly increase production if demand grows
- Add new features or accessories
- Build stronger partnerships with businesses and retailers

Evaluation & Control

Hannah

If things are OFF target :(

- Figure out what's causing the problem (is it the product issue? or marketing? or pricing?)
- Adjust the marketing message
- Try reaching a different audience
- Improve the product experience (update the app, fix bugs, improve setup, etc.)
- Offer promotions or change pricing if needed
- Experience new strategies
